 Address:
Subhash nagar, shatri nagar, jaipur (Raj.) India.

About :

There is couple principles which I use in my work routine.

1. Client always has to satisfied of work.

   1.1   Always trying to understand the business goals of
   client product.

2. Quality of work.

   2.1 During development always try to concentrate on high quality of product.

   2.2 Code always has to be testable and reusable

   2.3 Following of best practices and new technologies.

3. Be always in time.

   3.1 During planning of work it's always important to deliver in time

4. Communication is important.

   4.1   During development lifecycle client should be up to date with latest
   stable builds.

   4.2 Reports about our work.

5. Drink a cup of coffee during your break.

   5.1 Also, it's important communicate with coworkers for stress relief.

6. Strict to the strategy process.

   6.1 Always trying to follow selected strategy process (Waterfowl)

Except all principles above if you want to have all development process to go smoothly you can contact always to me.

Because I have experience with:

1. Continues Learning (Flutter)
2. Distributing release to clients.
3. Developing and covering code by tests
4. Publishing apps to the store.

Scope of technologies and programming languages which I'm using during development process:

1. Android
2. JAVA
3. XML
4. JSON
5. Gradle
6. PHP
7. Material Design

Hope after all things which I have describe above you will enjoy working with me :)

By the way, I'm passion on learning new technologies. I am able to switch in any technologies:)

Work Experience :

Hope Web Solution (Nov. 2017-
Present) Android Developer

Responsibilities in the project:
Highly concentrate on development and process skills in the development phase.

Technologies:

Java, Dagger 2, Databinding, MVVM, LiveData, Rxjava, Retrofit, Navigation, Multi-module architecture, Single Activity approach,MVC.

Projects :
Android Developer

Project Name: MoverInventory

Project Description:

MoverInventory helps you manage items in stock, warehouses, and transportation logistics - everything you need to minimize employee workloads, increase efficiency, and regain complete control of your inventory.

We have leveraged the latest and greatest in technological trends so you can:

-Print job-specific labels with corresponding QR codes so items can be scanned at any step in the process
-Provide complete visibility to your inventory at anytime, from any place
-Utilize automatic calculations of quotes, item inventory by volume and by weight, and fuel costs
-Reduce insurance premiums for your employees, customers, and stakeholders
-Improve customer engagement, increase transparency of process, and facilitate compliance by owning your inventory like never before
-Generate reports based on factors such as time, cost, volume, weight, warehouse, worker and more

Roles and Responsibilities:

- Whole project design and development by me.
